

# SUSE LINUX Professional 9.x

From a stable and reliable Linux operating system to a complete set of desktop applications - including an office suite, a Web browser, an instant-messaging client, multimedia viewers and graphical software - SUSE LINUX Professional has it all. It also offers the latest open source software for developing applications, setting up a home network, running a Web server and doing more with your desktop software than you ever thought possible. The South African OEM version includes installation media, complete documentation, and **FREE** locally-based installation support (0861-NOVELL). SUSE LINUX Professional delivers desktop reliability and security at the most affordable price.

## One desktop system with everything you will ever need:

**OpenOffice.org** – Provides a complete desktop environment which is fully compatible with all other common “office” applications. Word processor, spreadsheet, presentation package, database, drawing, desktop publishing and project management applications. The ability to read and write .doc, .xls and .ppt files. PDF file creation with a mouse click. Integrated HTML editor and drawing application. Web page development. As powerful as anything else on the market and more than you’ll ever need in a desktop application.

**Newest Desktop Environments**—It’s your choice: use the outstanding KDE or GNOME graphical desktop environments for Linux. Both deliver ease of use, contemporary functionality and the best graphical design.

**Firefox 1.0 Web Browser** - The latest open source Web browser provides new levels of power and performance. Rated in recent reviews as the best browser available anywhere. Other browsers integrated into the package include Konqueror, Epiphany, Mozilla, and Opera.

**Email, Calendar and Contact Management** - Novell Evolution 2.0 and Kontact 3.4 offer you a complete and easy-to-use e-mail client and calendar with improved connectivity to the most popular e-mail servers.

**Multimedia** – RealPlayer 10, multimedia players (amaroK and XMMS), music manager (JuK for large song collections), movie players (Kaffeine, Xine and Totem), synthesizers and drum computers, ripping and recording tools, CD- and DVD-burning utility (K3b burns data, music, and movies on to CD, DVD and VCD), video-editing (MainActor 5) and digital video recorder for digital TV.

**Photo Management** - Simplify photo management with cool tools like fspot, gwenview, digikam and gthumb.

**GIMP 2.2** - Complete graphics creation and editing comparable to Adobe’s *Photoshop*. Supports dozens of graphic formats: .tif, .jpg, .png, .eps, .svg, .psd, .gif and more.

**iPod & other Device Compatibility** - Manage your iPod files easily with both KDE 3.4 and GNOME 2.10. Connect with Mobile Phones, Palm Pilots, Bluetooth devices and other advanced mobile gadgets

**Broad range of development environments** - including KDevelop, the Eclipse Java environment and Mono, a development platform based on the .NET framework - for Linux and cross-platform application development with unprecedented productivity

**VoIP Solution Linphone** - Save money by making and receiving phone calls from the Web.

**Enhanced Laptop Support** - Special laptop features for users on the go include support for Intel Centrino, Bluetooth functionality, improved WLAN support and power management.

**Latest Linux Kernel** - Get in touch with the latest performance enhancements of Linux kernel 2.6.11 and check XEN the first open source virtualization solution.

**Built-in Security** - SUSE LINUX Firewall ensures that your system is secure and safe when it is connected to the Internet.

**Powerful Features for Home Networks** - SUSE LINUX Professional includes leading open source tools for home networking, including SAMBA, CUPS and much more

**PLUS, PLUS, PLUS** – Over 3,000 open source applications including educational software (astronomy, chemistry, mathematics, languages, construction and teaching), eight calculators, KMyMoney and more than 100 games (including the ever popular SuperTux, Asteroids, Tetris and Marbles ☺)
