

McAfee® virusscan®

your best protection against pc viruses

2005 version 9.0

Tens of thousands more viruses and virus-like threats exist this year than were identified last year? and the numbers continue to grow. It's a worldwide problem that can make its way onto your computer, including the potential to pass these same threats on to other computers.

With McAfee® VirusScan®, you can go online without the worry of getting a known virus. McAfee VirusScan offers the freedom to save, share and send data over the Internet. Up-to-date anti-virus software is critical in keeping e-mail and downloads free from the latest strains of viruses, mass-mailing worms, Trojans, dialers, and potentially unwanted programs (PUPs), such as spyware and adware, that invade? and sometimes destroy? computer hard drives. Automatic and virtually effortless, McAfee VirusScan helps you have a safe, complete online experience.

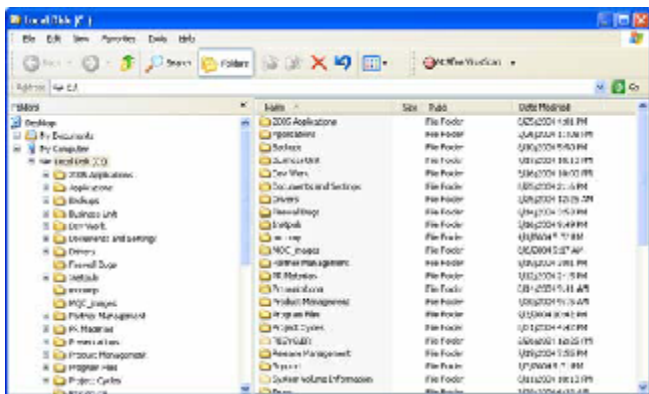

Prevents viruses when e-mailing, downloading and surfing

Every time you connect to the Internet, McAfee VirusScan automatically checks e-mail and e-mail attachments, Internet downloads, Instant Message attachments, chats and shared disks for viruses before they infect your hard drive or desktop.

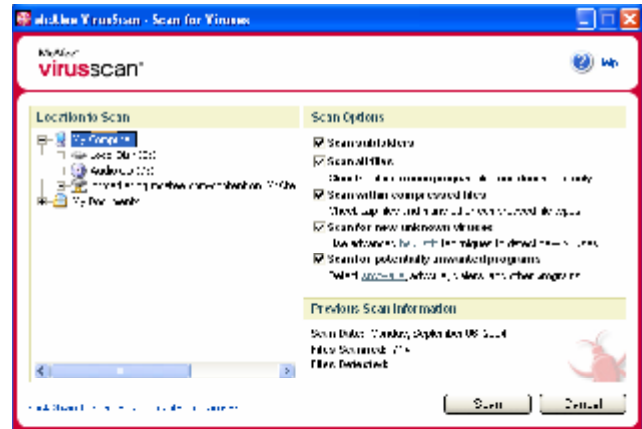

IMPROVED! Inbound and outbound e-mail scanning detects and removes mass-mailing worms, viruses and Trojans before they reach your computer's hard drive.

IMPROVED! Detection at multiple entry points, including e-mail, instant message attachments, and Internet downloads.

Windows® Explorer interface lets you scan files and more easily use VirusScan features within Explorer windows.

McAfee VirusScan allows you to scan files and folders directly from within the Windows Explorer window.

McAfee VirusScan provides out-of-the-box protection against malicious threats including potentially unwanted programs (spyware and adware).

Destroys viruses and virus-like threats

McAfee VirusScan automatically identifies viruses, mass-mailing worms and Trojans that may present a threat or create problems. Any suspicious files are immediately identified and, if possible, automatically cleaned. Those files that cannot be cleaned can then be either deleted or quarantined.

Superior and comprehensive anti-virus protection detects viruses, Trojans, worms, malicious ActiveX controls and Java applets.

WormStopper? monitors suspicious mass-mailing behaviors and notifies users once these activities have been detected.

ScriptStopper? technology prevents new, script-based threats like the Love You? virus.

Identifies spying and pop-up advertisement programs

More often than you may think, your online activity may be tracked by unsolicited third parties, threatening your privacy and data security. McAfee VirusScan detects potentially unwanted programs (PUPs)? including spying and pop-up ad programs like spyware, adware and web dialers, among others? that may collect personal information without permission.

IMPROVED! Spyware and Adware detection helps identify and remove spyware, adware and other potentially unwanted program privacy and security threats.

Proactive security information

Access to the McAfee® SecurityCenter ensures that you receive the latest virus outbreak information. The SecurityCenter provides a Security that assesses, informs, and warns you about possible security vulnerabilities.

Submit files to AVERT?

AVERT® (McAfee® Antivirus Emergency Response Team) is the top ranked anti-virus research center in the world. The research team reacts quickly to threats and encourages McAfee users to report suspicious files that may contain new viruses or other threats.

Virus map and information library

View the latest threats that are infecting computers worldwide, and then research them via direct links to the Virus Information Library (VIL).

Quarantine of infected files isolates suspicious files for added security and future action.

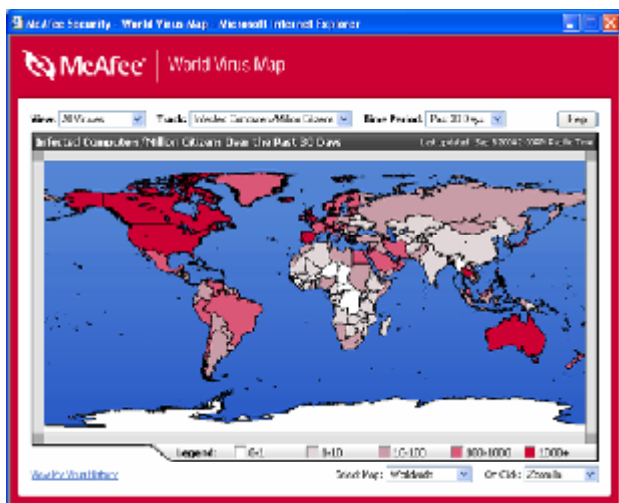

Updates automatically to protect against new threats

Through automatic online updates, McAfee VirusScan protects against the latest identified virus strains. These effortless updates often anticipate new threats? keeping pace with ever-changing technology and offering you the best protection available.

One year of virus definition updates with the purchase of McAfee VirusScan; annual subscription available online for subsequent virus definition updates.

Silent and automatic updating helps keep your PC safe from the latest threats when connected to the Internet.

Flexible scanning options for conducting an automatic, scheduled scan that saves time and increases confidence.

The World Virus Map shows the spread of malicious threats throughout the world.
