As a phenomenon known to thin-film transistors (TFTs), liquid crystal displays (LCDs) commonly exhibit a small number of discolouration dots, as so-called "non-conforming pixels". This phenomenon is a limitation of TFT LCD technology, not a product defect, and as such is not covered by Acer's warranty.

### About Acer

Acer ranks among the world's top ten branded PC vendors, designing and marketing easy, dependable IT solutions that empower people to reach their goals and enhance their lives. In 2000, Acer spun-off its manufacturing operation to focus on globally marketing its brand-name products: desktop and mobile PCs, servers and storage, displays, peripherals, and e-business solutions for business, government, education, and home users. Established in 1976, the pan Acer Group employs 39,000 people supporting dealers and distributors in more than 100 countries. Revenues reached US\$15.6 billion in 2003.
