ACER TRAVELMATE C300 FULL-SIZED CONVERTIBILITY

With mobile power users permanently on the move, true portability means bringing advance features into the hands of business professionals. Featuring Intel®'s revolutionary Centrino™ mobile technology, a large rotating screen, full-sized keyboard and all the benefits of tablet technology, the TM C300 series is ideal for self-employed and professional users from Small, Medium and Large Corporations looking for a fully flexible notebook coupled with the efficiency and convenience of electronic ink and character recognition for daily work.

Full-scale Convertibility

Despite the clear advantages to be gained from jotting down notes and comments directly onto notebooks with a stylus, many "corridor warriors" have been put off the on-the-go computing of ultraportable tablet PCs by their limited size. With the TM C300 series, Acer offers full-size convertibility in a stylishly slim, lightweight unit. The Tablet PC you'll want to use as your primary computer.

... and Run Away Efficiency

By bringing the ground-breaking handwriting recognition features of ordinary Tablets to an even larger audience, the TM C300 lets users experience the sudden surge in efficiency from the use of electronic ink in any office document, allowing them to revise, edit, and repurpose their handwritten notes after writing them on the computer screen with the stylus while on the move.

Unconstrained power

The TM C300 features Intel®'s latest Centrino™ Mobile Technology for enhanced portability, integrated and flexible connectivity and enhanced battery life. Complete with Intel® Pentium® M processor, 512 (2x256)MB DDR memory, up to 60GB enhanced-IDE hard disk drive, the TM C300 guarantees superior power independence while the 7-hour battery life provides all the wireless freedom you need. In addition, the integrated AcerMedia bay enables users to hot swap between optical drives, optional 2nd hard drive or battery eliminating time-wasting reboots and reducing TCO to a minimum.

Conveniently Versatile

The TM C300 is the first Tablet PC to feature a large 14.1" XGA (1024 x 768) TFT LCD screen, supporting up to 16.7 million colours to give presentations even greater impact. Yet the TM C300 offers so much more. The rotating screen can quickly transform into a writing surface which is ideal for taking notes, annotating documents or completing online forms. Additionally, it features one of most advanced character recognition engines available for scanning, searching and indexing handwritten documents, as well as converting hand written text into printed text, taking work efficiency and convenience to new heights.

Comprehensive Connectivity

The TM C300 series offers a full set of communication and interfacing options including 10Base-T/100Base-TX/Giga LAN for wired LAN connection and 802.11b for stable connectivity in wireless environments in addition to an integrated V.92 56Kbps ITU modem (with international PTT approval), allowing professionals to stay in touch no matter where they are. In addition the TM C300 offers comprehensive multimedia interfacing through 1394- and S-Video interfaces, plus a 4-in-1 card reader supporting Secure Digital (SD), MultiMediaCard, SmartMedia and Memory Stick formats, and two USB 2.0 ports providing a complete range of anytime, anywhere connectivity.
